

Abstract (in conjunction with figure 2)

For the purpose of folding a blank (11) in a U-shaped manner around an article or a folding mandrel, use is made of a folding roller (34) which is mounted at a fixed location, is driven in rotation and is rolled, by way of a lateral portion (35), over the facing surface of the pack (10) or of the folding mandrel (17) with blank (11).
